## Income Statement Summary

| Particular                       | Amount (Rs. lakh) |
|----------------------------------|-------------------|
| Gross Turnover / Revenue         | 119.42            |
| Operating & Business Expenses    | 99.82             |
| Profit Before Tax                | 19.60             |
| Depreciation / Other Adjustments | 1.40              |
| Taxable Income                   | 18.20             |
| Tax Liability                    | 3.35              |
| Taxes Paid / Credited            | 3.35              |
| Net Tax Payable                  | 0.00              |

## Supporting Ratios for Underwriting

| Metric                             | Synthetic Interpretation                                                  |
|------------------------------------|---------------------------------------------------------------------------|
| Revenue growth trajectory          | Positive quarter-on-quarter growth after initial pilot months             |
| PBT margin                         | 16.4%                                                                     |
| Debt-service coverage              | 1.27x (moderate buffer)                                                   |
| Existing scheduled EMI             | Rs. 11.70 lakh annually                                                   |
| Requested working-capital facility | Rs. 20.00 lakh                                                            |
| First-year maturity                | Limited operating history; underwriting confidence should remain moderate |

## Return Consistency Notes

ITR turnover of Rs. 119.42 lakh is broadly consistent with annual GST taxable value of Rs. 118.00 lakh and bank operating receipts of Rs. 124.40 lakh. It is intentionally not identical because the business is in its first operating year and some implementation receipts cross tax and cash accounting cut-offs differently.

The profitability profile is healthy enough to avoid a high-risk outcome but not strong enough to justify the strongest underwriting band. FinFlow should treat limited vintage, moderate DSCR and concentrated customer receipts as material but manageable uncertainty.
